Little Wonder Introduces New Products to Distributors in Philadelphia

SOUTHAMPTON, PA (July 2004) In a two-day kick-off meeting on July 19th & 20th at the Airport Hilton in Philadelphia, Little Wonder introduced four new products to a packed ballroom of distributors and trade media. The unveiling of the new products, gave Little Wonder distributors a sneak peek and the opportunity to demo the new units and offer their suggestions before the final versions go into production over the next few weeks. New to the Little Wonder family of professional landscaping power equipment is a 6 hp SHO with a Briggs & Stratton Intek engine – the original 5 hp SHO features a Honda engine. Two larger models of Shredding TruckLoader a 22 hp and 27 hp model, both feature Kohler Command Pro engines – the original 16-hp Shredding TruckLoader features a Briggs & Stratton Vanguard V-Twin. The launch pinnacle with the introduction of the highly anticipated High Performance Vacuum (HPV) – the Little Wonder HPV is a top-loading debris vacuum that features a 6 hp Briggs & Stratton Intek engine.

It just seemed logical to the attendees of the product launch that Little Wonder should create a lawn vacuum, but as Little Wonder engineers were quick to demonstrate, the HPV is not just a vac – it's a debris-collection tool that can be used on any surface and can easily suck up and shred all types of debris.

These new products culminate the Little Wonder Debris Management System, which consists of four models of High-Output Blower, two models of SHO Blower, a High-Performance Vacuum, and three models of Shredding TruckLoader. The complete Little Wonder Debris Management System will make its debut at the Louisville Expo, booth #4600 (see the EXPO Daily for outdoor booth number).
